

VisionArray® MYCO Chip 1.0

Introduction

The VisionArray® MYCO Chip 1.0 is intended to be used with the VisionArray® Analysis Package for the qualitative detection and identification of PCR amplicates of the genera *Mycobacterium*, *Mycobacteroides*, *Mycolicibacillus*, *Mycolicibacter*, and *Mycolicibacterium* as well as several clinically relevant mycobacterial species that have been produced with the help of the VisionArray® MYCO Primer Kit 1.0 or the VisionArray® MYCO PreCise Master Mix.

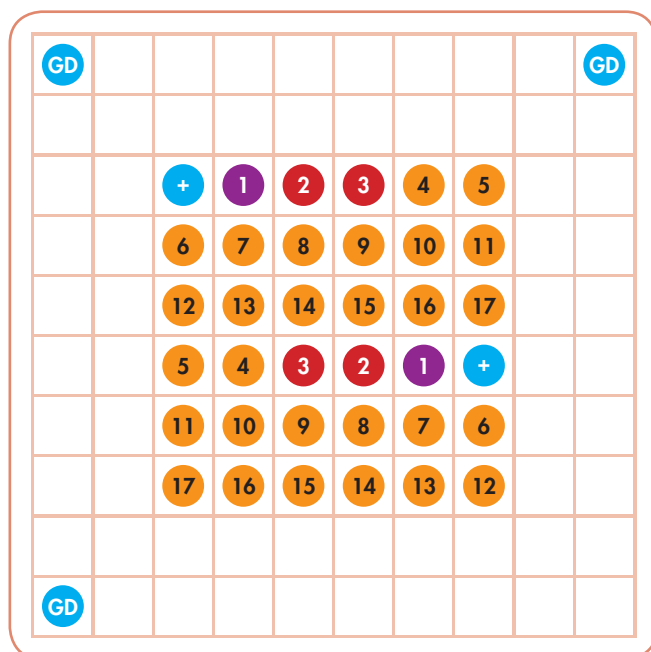

The mycobacterial genera comprise more than 140 species, which, for the purpose of diagnosis and treatment, have been grouped into three categories: *M. tuberculosis complex* (MTC), *M. leprae*, and non-tuberculous mycobacteria (NTM).

The majority of the *Mycobacterium* species belongs to the NTM group and can be found in different environments. Many of these bacteria cause life-threatening infections in humans and in recent years, the mortality and morbidity associated with NTMs has increased especially in immunocompromised patients worldwide. Treatment of NTMs is specific to each species and therefore a clear distinction between the present species is of extreme importance.

Reliable and rapid molecular diagnostics are the basis of an adequate therapy that is given by the VisionArray® MYCO Chip 1.0.

Chip Description

The VisionArray® MYCO Chip 1.0 is designed to detect several clinically relevant mycobacterial species. All capture sequences and the positive control are set up on the chip as duplicates and the guide dots as triplicates. The signals are visible on the chip as dark blue areas. The automated evaluation of the results is performed by the VisionArray® Analyzer Software.

GD Guide Dot + Positive Control 1 MYCO spec.

M. tuberculosis (MTC) complex

- 2 M. tuberculosis complex (ITS Region)
- 3 M. tuberculosis complex (IS6110 Region)

Nontuberculous Mycobacteria (NTM)

- | | |
|---|---|
| 4 M. abscessus | 11 M. malmoeense |
| 5 M. avium /
M. intracellulare complex | 12 M. marinum / M. ulcerans |
| 6 M. chelonae | 13 M. scrofulaceum /
M. parascrofulaceum |
| 7 M. fortuitum | 14 M. simiae |
| 8 M. genavense | 15 M. smegmatis |
| 9 M. haemophilum | 16 M. szulgai |
| 10 M. kansasii | 17 M. xenopi |
